

A MINI HTML PROJECT

LEARNING SYSTEM

**Under the guidance
Anurag Mishra**

Submitted by:

NIKHIL KUMAR SINGH

Reg no. : 12219865

Roll no. : RKOC29A28

Section : KOC29

Technologies used

HTML – Hyper Text Markup Language is used in this website to define the Layout of Webpages.

Some examples:-

- The <input> tag specifies an input field where the user can enter data.
- The <button> tag defines a clickable button. Inside a <button> element you can put text (and tags like <i> , , ,
 , , etc.).
- Img tag is used to display image on the web page. HTML img tag is an empty tag that contains attributes only, closing tags are not used in HTML image element.
- Paragraph or HTML p tag is used to define a paragraph in a webpage. Let's take a simple example to see how it work. It is a notable point that a browser itself add an empty line before and after a paragraph. An HTML <p> tag indicates starting of new paragraph.

CSS – Cascading Style Sheet is used to Style the Layout of a Webpage.

- In this project, External CSS is used. All are linked with HTML pages using a link tag inside Head Tag.
- The navigation bar, Side Navigation bar and Main content of the Webpage is styled using CSS.
- **Some examples:-**

width Sets the width of an element

padding A shorthand property for all the padding-* properties

margin Sets all the margin properties in one declaration

height Sets the height of an element

color Sets the color of text

font A shorthand property for the font-style, font-variant, font-weight, font-size/line-height, and the font-family properties

❖ **Many other tags have been used
screenshots on coming pages**

About Project

Title of Project :- Learning System

Learning system is a platform where we can learn anything. This would be such a platform from which we can study anywhere as your comfort. This is mostly important for person who even at work and with anywhere. it is very useful for the who can not afford more in their education. This platform is easily to access anytime with lots of repeat with anywhere so its very useful to learn in present time.

➤ FLOW OF PROJECT:

I am individually worked kind a technically and also by gathering the Information of the learning system from google. Most of the project is based upon HTML and CSS

• **HTML**

```
• <!DOCTYPE html>
• <html lang="en">
• <head>
•   <title>Learning System</title>
•   <link rel="stylesheet" href="index.css">
• </head>
• <body>
•
•   <div class="main">
•     <div class="navbar">
•       <div class="icon">
•         <h2 class="logo">CIPHER SCHOOLS</h2>
•       </div>
•
•       <div class="menu">
•         <ul>
•           <li><a href="#">HOME</a></li>
•           <li><a href="#">VIDEOS</a></li>
•           <li><a href="#">TUTORS</a></li>
•           <li><a href="#">TEST YOURSELF</a></li>
•           <li><a href="#">CONTACT US</a></li>
•         </ul>
•       </div>
•
•       <div class="search">
•         <input class="srch" type="search" name="" placeholder="Type To Search">
•         <a href="#"> <button class="btn">Search</button></a>
•         <i class="fas fa-bars"></i>
•       </div>
•
```

```

• </div>
•
• <div class="content">
•   <h1>Web Design & <br><span>Development</span> <br><br>Courses</h1>
•   <p class="par">HTML<br> CSS<br>JAVA<br>JAVASCRIPT
•   <br>
•
•   <button class="cn"><a href="#">PREVIOUS PAGE</a></button>
